Former Release Agent – powder free glove applications

PRODUCT DESCRIPTION

Detac CS40 is a Calcium Stearate based dispersion is a specially formulated fatty acids dispersion that is manufactured for the special antitack properties that is required in latex glove manufacturing applications. It is easily miscible with water and no vigorous stirring is required to dilute to required percentage for use in the coagulant tank together with calcium nitrate for powder free gloves manufacture –especially for NR latex gloves production, while it also can be used in NBR gloves as antitack.

APPLICATIONS

It can be as release agent in powder free Latex Gloves, condoms, uncured rubber compounds eg retreads, injection or moulded rubber products (Cycle tire) etc.,

Detac CS40

(Former release agent – powder free coagulant)

FEATURES

- ★ *Partially soluble in water*
- ★ *Ease of use, less foamy*

BENEFITS

- ★ *Reduced formulation cost*
- ★ *Improved detackifier properties*

TYPICAL PROPERTIES

pH @30 Deg C

Physical Form

Specific Gravity

Viscosity -cps

Total Solids

8.0 -13.0

Milky white to Off white liquid

1.00 – 1.04

10–1000 @25°C(sp62;100 rpm)

40 +/- 2.0%

CLASIFICATION

Molecular Formula

CAS No.

Stearic Acid Calcium Salt

1592-23-0

PACKING

It is packed in 200 kg open top HDPE/PP drums or IBC Tanks of 1,000kg

STORAGE

*Store in cool, dry conditions and keep away from direct heat source and sunlight.
When not using the material always seal the packing.*

SHELF LIFE

At least 6-9 months when stored in sealed packing under above mentioned conditions.
